EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Steve Bachmann (Reg. No. 50,806) on 3/21/11.

The application has been amended as follows:

Delete lines 3-6 of claim 22 and replace with:

"supporting the entire body of a patient with a single integrated device, the single integrated device comprising a bed structure, a computing system, medical care device, and medical monitoring device, the single integrated device configured to allow the integrated point of care system to operate as a mobile point of care device as a single unit;"

Delete "single structure" at line 21 of claim 22 and replace with "single integrated device"

Allowable Subject Matter

2. Claims 1-26 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Claims 1 and 22 are directed to an integrated point-of-care system and a method of operating an integrated point-of-care system.

The closest prior art of record, Reeder et al. (US 2002/0044059 A1) and Cairnes (6,139,494) teach supporting the entire body of a patient, a computing system, medical care devices, and medical monitoring devices by using a single structure, the single structure configured to allow the integrated point of care system to operate as a mobile point of care device; transmitting control instructions to medical devices; executing therapeutic options; exchanging data between the computing system and a central data repository through a communication network; transporting the patient, the medical monitoring device, the medical care device, and the computing system together using the single structure; and applying virtual medical logic based on patient information and research data to generate diagnostic and therapeutic options for providers based on medical logic and providing the decision-making options for display.

However, the closest prior art of record does not teach or fairly suggest a *single integrated device* for providing integrated point-of-care, the single integrated device including a bed structure, one or more medical monitoring devices, one or more medical care devices, and an interactive computing system that generates decision options for providers.

Dependent claims 2-21 and 23-26 incorporate the allowable subject matter of their respective independent claims, through dependency, and are also allowable for the same reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should

Art Unit: 3686

preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
